Dynamic engineering and manufacturing leader with more than three decades of experience transforming operations across pharmaceutical, biotechnology, aerospace, and advanced manufacturing sectors. Expert at scaling novel technologies from concept through pilot plant to global commercialisation, embedding Industry 4.0 principles, automation, robotics, and digital manufacturing to improve throughput and consistency. Trusted to lead multi?million New Product Introduction programmes and global operations under ISO13485, ISO9001, and GMP, aligning technical strategy with commercial objectives while building high?performance, cross?functional teams. Brings rare dual credibility in the boardroom and on the factory floor, consistently driving innovation, operational excellence, and sustainable competitive advantage.

Proven track record of measurable impact in NPI and technology transfer, lean manufacturing, continuous improvement, and supply chain optimisation. Delivered facility transformations to achieve regulatory certification and product launch, implemented automation and robotics projects that produced double?digit yield and cost improvements, and led digital manufacturing initiatives that significantly reduced cycle times and waste. Experienced in stakeholder engagement at

executive level, vendor management, and delivering complex change programmes that secure new contracts and expand market access. Recognised for mentoring teams, presenting technical strategy to large audiences, and translating engineering solutions into commercial value.
