Senior Development Engineer – Medical Devices

Description

Newton Colmore Consulting are partnered with a leading medical devices company in rural Cambridgeshire who are looking for an experienced medical technology development engineer.

This exciting new role will give you the opportunity to use your experience to come up with creative solutions to engineering problems then going on to complete theoretical analysis and technical development of the invention.

As a Senior Development Engineer, you will be working on highly complex medical devices, from initial concept stages through to validation and testing. You will be charged with driving the generation and detailed development of innovative concepts as well as mentoring the next generation of engineers and scientists. After completing your analysis and testing you will then be reporting your findings back to senior members within the business where together you will draw meaningful conclusions from your findings.

This company heavily invests in research and development so you will always have something new on your horizon. They also invest in their people with industry leading training and development for all their engineers.

This role would be perfect for someone who wants to come up with new ideas for technology that aims to save and improve people's lives.

To succeed in this role, you will need to have commercial experience within the medical devices sector, ideally from a mechanical engineering, bioengineering or physics background. You will need strong knowledge of engineering and physical principles as well as excellent pen-and-paper mathematical skills.

In exchange for your skills and expertise, the company offers a highly competitive package as well as providing an environment for you to thrive. This is a great opportunity to make a real difference with technologies that are revolutionising the sector.

We are looking to arrange interviews for this role as soon as possible so if the role is of interest make an application now. You can speak with our medical devices specialist consultant Matthew Lowdon on 0121 268 2240 if you need further information.

Newton Colmore Consulting is a specialist recruitment consultancy operating within the medical devices and scientific engineering sectors. We conduct bespoke searches for our clients across the globe. We are continually running searches across R&D so take a look at our open roles on our website.
